

Barakat Cotton

Barakat Cotton manufactures cotton fiber for use in hygienic, medical, health, personal and home care applications.

At Barakat Cotton, we pride ourselves in producing high-quality, bleached absorbent cotton according to international pharmacopoeia standards.

We use cutting-edge technology, as well as industry-best practices in the production process. Through established strategic partnerships with our raw cotton suppliers from around the world, we meet or exceed our clients' wide range of needs, enabling us to produce trusted, pure, and safe cotton for the end user.

Based in Gaziantep, Turkey which provides easy access to major ports and transportation hubs, Barakat Cotton is one of the newest and technologically most advanced cotton processing plants in Turkey.

Through our affiliate company, Barakat Alfa, we have been in the cotton industry for two decades. Established in Uzbekistan in 1999, Barakat Alfa was the first to bring a fully integrated, fully automated absorbent bleached cotton plant in the region, establishing itself as one of the largest in Central Asia.

Pure,
High Quality Cotton,
Customised to Your Specific Needs.

Our Production:

With two decades of experience in this field, Barakat Cotton has been able to perfect its production process.

Barakat Cotton produces bleached cotton products while adhering to the technical specifications and analytical methods regulated and set forth by the European Pharmacopoeia standards.

Quality control tests are carried out at our fully equipped and modern laboratory facility in order to ensure that all products meet or exceed the aforementioned standards.

When creating a product made with our bleached cotton, you need to know you're using a product you can trust. At Barakat Cotton, we make high quality and total customer satisfaction our highest priorities. From our rigorous manufacturing process to our meticulous quality testing, we create a product that meets even the highest specifications, including European Pharmacopoeia and international quality standards. When using our bleached cotton, you know you're getting the industry's best option.

Meeting the Industry's Highest Standards
To Bring the Cotton You Deserve.

Our Products:

Barakat Cotton produces bleached absorbent cotton using hydrogen peroxide under superior quality control standards, ensuring our products meet or exceed total hygienic protection from start to finish. We follow the high standards set forth by the world's medical cotton industry. Our plant has an inhouse laboratory, with state-of-the-art testing equipment and highly skilled technicians with many years of experience in their field.

Samples taken from each batch of production are tested in our laboratory for the following: humidity, foreign fiber (fluorescence), sinking time, water absorbency, surface active substance, fiber length, micronaire, pH and texture. In addition, tests on ether-soluble substances, water-soluble substances, sulphated ash, neps, extractable colouring matter and viscosity are also performed. Tested samples taken from each batch are then stored in our special sample room as evidence for minimum period of 4 months.

Pure, High Quality Cotton. Customised to Your Specific Needs.

Cotton Comber Soft: High quality, softness, and whiteness; increased elasticity; high liquid retention and absorbency. Preferred for cosmetic and baby products.

Cotton Comber Crispy: High quality, firmness, and elasticity; incredibly durable and resistant to breakage. Preferred for cotton buds, nonwoven fabrics, and sliver hoisting.

Cotton Comber Extra Crispy: Extra Crispy, High quality and whiteness; high liquid retention and absorbency; certified eco-friendly.

Cotton Comber Hydrophobic: Hydrophobic Cotton, suitable for production of specialty and security papers.

Organic Comber: Our organic cotton combers are produced from 100% organic cotton, certified by GOTS (Global Organic Textile Standard). The raw material used comes from certified organic cotton plantations certified by GOTS.

The **Global Organic Textile Standard (GOTS)** is recognised as the leading processing standard for textiles made from organic fibres worldwide. It defines high level environmental criteria along the entire supply chain of organic textiles and requires compliance with social criteria as well.

Other products which can also be produced as per customer specification:

Paper Touch Comber, Extra Absorbent Comber, Non-Bleached Comber.
Virgin Cotton.

Cotton for a Better World.

Bringing Quality to Absorbent Cotton,
One Fibre at a Time.

Applications: Our absorbent bleached cotton is suitable for the manufacture of all basic cotton products, such as : Cotton Balls & Cotton Swabs, Skincare & Facial Cleansing Pads, Cosmetic Pads, Baby Care, Feminine Care, Medical Cotton, Wet Wipes, Filtration, Specialty Papers, Security Papers.

Our Commitment to the Environment: The cotton bleaching process uses chemicals, but it doesn't have to be harmful to our earth. We're dedicated to limiting our impact on our environment, so we've designed our process to remain environmentally friendly. Along with choosing sustainable materials and eliminating chlorine from our bleaching process, we carefully treat chemicals from our water waste before it leaves our facility. This helps protect the environment and limits our impact throughout our world.

Quality Commitment: When creating a product made with our bleached cotton, you need to know you're using a product you can trust. At Barakat Cotton, we make high quality and total customer satisfaction our highest priorities. From our rigorous manufacturing process to our meticulous quality testing, we create a product that meets even the highest specifications, including European Pharmacopoeia and international quality standards. When using our bleached cotton, you know you're getting the industry's best option.
